

Installation Precautions

CAUTION: SERVICING

- DURING AND FOLLOWING OPERATION OF THE HUMIDIFIER, THE STEAM COMPONENTS IN CONTACT WITH THE STEAM CAN BECOME HOT AND BURN IF TOUCHED.

Notice

Installation of the enclosed components may have complex implications or require particular specializations in order to successfully and safely carry out the installation or operation.

In the event there are any questions or concerns pertaining to the correct and safe installation of the enclosed components into Condair equipment, the humidifier installation and operations manual will cover many of the details, your local Condair vendor may be able to address many other inquiries or provide supporting information. Condair technical support personnel are also available to address inquiries unable to be resolved by your local Condair representatives.

Ensure all those who perform work on or around Condair equipment are adequately qualified to perform the work safely and trained in safe work practices. Condair does not accept any liability for installations of humidity equipment installed by unqualified personnel or the use of parts/ components/ equipment that are not authorized or approved by Condair.

Please be prepared to provide humidifier serial number information prior to contacting factory support.
